

COVID-19 Services

VectorB2B will be your preferred partner in your *in vitro* viral screening programs by offering:

- ▶ Efficacy testing of your antiviral agent that includes SARS-CoV-2 propagation, determination of viral titers, and testing of your antiviral agent of interest. The tests are conducted in a BSL-3 facility. We will provide you with dose-response curves and determination of IC50.
- ▶ As an add-on to our antiviral testing services we also evaluate cytotoxicity in uninfected cells.

OUR MISSION

VectorB2B aims to enable the discovery and development of new therapies, by offering a range of comprehensive services and expertise to clients in the biotech, pharmaceutical, and academic sector. We earn our clients' trust by offering the best services, tailored to your specific needs.

WHY US?

We offer a low-risk “one-stop shop” for large- or small-scale projects, made possible by the depth of experience and the expertise of VectorB2B scientific team. VectorB2B will deliver high-quality custom or standard drug discovery solutions on time and budget.
